

LOST your dog?

I operate *CritterGitter* Wildlife Control Services and come across many dogs during my travels. I utilize over 30 game cameras to help find the predators that I am after by monitoring baits, trails, road allowances and water holes. Sometimes I get pictures or videos of dogs. If you need help locating your lost family friend please send pictures and any pertinent details to Perry at crittergitter@sasktel.net

I will keep the information on my tablet to compare to wandering dogs. I am offering assistance in the following RMs- 189, 190, 217, 218, 219, 220, 247, 248, 277 and 278.

There will be no fees for this service.
